LMS (Learning Management System) LLTC utilizes CANVAS. It is important to continually log into your CANVAS account and your email account to maintain your presence.

Synchronous online classes are those that require students and instructors to be online at the same time. An example of a synchronous class is a live lecture that is streamed to students over the web.

Asynchronous classes are just the opposite. Instructors provide reading materials, recorded lectures, tests, and assignments that can be accessed at any time during a specified period as outlined by your instructor. These classes are considered **On Line**.

Polysynchronous classes will meet once per week via a zoom session and all other class materials will be posted in CANVAS, i.e. reading assignments, recorded lectures, tests, course modules.

Hybrid classes are those in which some course instruction and activities take place in the face-to-face classroom (instructor and students together in one location) and some take place online.
