* **Synchronous** online classes are those that require students and instructors to be online at the same time. An example of a synchronous class is a live lecture that is streamed to students over the web.

** **Asynchronous** classes are just the opposite. Instructors provide reading materials, recorded lectures, tests, and assignments that can be accessed at any time during a specified period as outlined by your instructor.

*** **Hybrid** classes are those in which some course instruction and activities take place in the face-to-face classroom (instructor and students together in one location) and some take place online.
