**LMS (Learning Management System) LLTC utilizes CANVAS. It is important to continually log into your CANVAS account and your email account to maintain your presence.**

**Synchronous** online classes are those that require students and instructors to be online at the same time. An example of a synchronous class is a live lecture that is streamed to students over the web.

**Asynchronous** classes are just the opposite. Instructors provide reading materials, recorded lectures, tests, and assignments that can be accessed at any time during a specified period as outlined by your instructor.

**Polysynchronous** classes will meet once per week via a zoom session and all other class materials will be posted in CANVAS, i.e. reading assignments, recorded lectures, tests, course modules.

**Hybrid** classes are those in which some course instruction and activities take place in the face-to-face classroom (instructor and students together in one location) and some take place online.
