***Synchronous** online classes are those that require students and instructors to be online at the same time.

****Asynchronous** classes are just the opposite. Instructors provide reading materials, recorded lectures, tests, and assignments that can be accessed at any time during a specified period as outlined by your instructor.

*****Hybrid** classes are those in which some course instruction and activities take place in the face-to-face classroom (instructor and students together in one location) and some take place online.

Hyflex or hybrid flexible course format is an instructional approach that combines face-to-face (F2F) and online learning. Each class session and learning activity is offered in-person, synchronously online, and asynchronously online.

Polysynchronous classes will meet once per week via a zoom session and all other class materials will be posted in CANVAS, i.e. reading assignments, recorded lectures, tests, course modules.
