Synchronous online classes are those that require students and instructors to be online at the same time.

Asynchronous classes are just the opposite. Instructors provide reading materials, recorded lectures, tests, and assignments that can be accessed at any time during a specified period as outlined by your instructor.

Hybrid classes are those in which some course instruction and activities take place in the face-to-face classroom (instructor and students together in one location) and some take place online.

Hyflex or hybrid flexible course format is an instructional approach that combines face-to-face (F2F) and online learning. Each class session and learning activity is offered in-person, synchronously online, and asynchronously online.

Polysynchronous classes will meet once per week via a zoom session and all other class materials will be posted in CANVAS, i.e. reading assignments, recorded lectures, tests, course modules.
